

Klüberplus C2 PM2 Ultra Dry

The next generation of conveyor belt lubricant

KLÜBER
LUBRICATION

your global specialist

Klüberplus C2 PM2 Ultra Dry was specifically developed for the lubrication of conveyor belts made of plastic.

Continued advance on the path to food safety

- Registered with NSF as food-grade H1
- ISO 21469 certification meets hygiene requirements

Deliver superior performance

- Less residue formation
- Better lubricant performance, due to stable Coefficient of Friction
- Improved hygiene conditions = less clean up
- Lower operational costs
- Less use of cleaning agents

Increase productivity

Klüberplus C2 PM2 Ultra Dry

Competitor product

- ➔ Extremely low lubricant consumption
- ➔ Less need for periodic cleaning
- ➔ Higher availability of machines for production
