

Meat Processing Solutions

Increase efficiency and reduce contamination risks

KLÜBER
LUBRICATION
your global specialist

As the largest segment of U.S. agriculture, the meat and poultry industry plays a vital role in sustaining the nutritional needs of roughly 326 million Americans.

Efficiency and reliability are at the core of this vast production network, which means choosing the right lubrication solutions is paramount. Choosing Klüber Lubrication means choosing a partner dedicated to enhancing efficiency and reliability – not only in one of our nation's most vital industries, but in your operation.

Increase efficiency and mitigate risks within your plant when you use Klüber Lubrication's meat processing lubrication products. With precise formulations designed for high-performance machinery, our lubricants reduce friction, wear, and downtime, while maintaining unwavering commitment to food safety.

Contact us today at info@us.kluber.com to move forward with efficient and effective meat processing solutions that reduce contamination risk and ultimately save you time and money.

Main Product Benefits

Refrigeration Compressor

Klüberoil NH1 SUL 4 US & Klüberoil SUL 1-68 US

- Extended oil change intervals
- Minimizes lubricant disposal costs
- Improved equipment performance
- Increased potential for energy savings & reduced CO2 emissions

Gear & Rolling Bearings

Klübersynth NH1 4N

- Good wear protection for gears and rolling bearings
- Proven elastomer compatibility for problem-free operation
- Energy savings due to optimized friction behavior
- Long-lasting quality for consistent performance throughout its service life

Hydraulic Systems

Klüberfood 4 NH1 – 15 .. 100

- Synthetic base oil
- Extends oil change intervals
- Reduce operating costs in Hydraulic Systems
- Reduce contaminant buildup and valve blockage
- NSF H1
